Solar Powered Camera Trailer

Product
Brochure

MineEYE has been developed by LC Products in alliance with HSI. It is a fully ruggedized solar powered camera system; self-contained, transportable and compliant with mine site Wide Area Networks. Safety aspects include a pneumatic mast system requiring little effort to extend to full height for optimal camera coverage. The system can be setup and operational in minutes.

Features include:

- Heavy-duty steel frame, treated for high-level of corrosion resistance
- 24/7 operations monitoring utilising solar power and battery backup
- Heavy-duty, military specification, high-precision Pan/Tilt/Zoom camera
- Continuous 360-degrees pan
- Incident capture & review function
- Remote access and camera control from any computer on site via wireless networks
- High resolution images
- Reduced light vehicle movement around site
- Increased resources efficiency
- Designed for safety in mine site operations
